**NOW, THEREFORE**, in consideration of the mutual promises contained herein, it is hereby agreed as follows:

1. Duties. The City hereby contracts with Contractor to perform all functions and duties of the prosecuting attorney of the Clarkston Municipal Court (i.e., serve as City Solicitor) and to perform such other legally permissible and proper duties and functions as said position shall require. 3. Term. This Agreement shall commence on January 1, 2025 and shall continue for an initial term of one year, until December 31, 2025. This contract may be renewed annually upon the terms set forth herein or upon any other terms mutually acceptable to both parties.

## CITY OF CLARKSTON

ITEM NO: 6C

### CITY COUNCIL WORK SESSION

**MEETING TYPE:**  
Work Session

### AGENDA ITEM SUMMARY SHEET

**ACTION TYPE:**  
Discussion

**MEETING DATE: October 29, 2024**

**SUBJECT:** To discuss approving the annual insurance premium payment to the Lexington Insurance in the amount of \$41,756 for the city's leased office space located at 736 Park North Blvd to be funded out of the General Fund

**DEPARTMENT:** CITY ADMINISTRATION

**PUBLIC HEARING:** ☐ YES ☒ NO

**ATTACHMENT:** ☒ YES ☐ NO  
**PAGES:**

**PRESENTER CONTACT INFO:** Dr. Dwight L. Baker  
**PHONE NUMBER:** 404.824.8135

**Purpose:** To update Mayor and Council on the status of insurance quotes for coverage, particularly regarding policies that are suitable and financially viable given our needs. Securing this insurance is critical to providing comprehensive risk management for our municipality and ensuring continuity of services. Additionally, we need to obtain Renters Insurance to enable contractors to commence construction in the new office space facility.

**Need/Impact:** There is a pressing need for insurance coverage that meets specific liability and compliance requirements associated with municipal operations, including the added complexity of Police Department exposure. A lack of suitable insurance options limits our ability to mitigate risks adequately, which could impact operations and potentially increase liability for the municipality. Furthermore, Renters Insurance is necessary to initiate construction activities in the new office space, making it an immediate priority to meet project timelines.

**Current Status and Market Feedback:** Several insurance providers have reviewed our request, with feedback primarily reflecting challenges associated with municipal risk categories and Police Department exposure. Below is a summary of the responses received from each market:

- MUSIC Insurance – Declined due to Police Department exposure.
- Maxum – Declined due to both the Municipality class of business and Police Department exposure.
- Atlantic Casualty – Declined due to Municipality class of business.
- Northfield – Declined due to Municipality class of business and Police Department exposure.
- Nationwide – Declined due to Municipality class of business; property coverage only available pending building information.
- Genstar – Declined due to Municipality class of business.
- Pen America – Declined due to Municipality class of business.
- Nautilus – Declined due to Municipality class of business and Police Department exposure.

- Travelers Insurance – Declined due to Municipality class of business.
- Cincinnati Insurance Company – Declined due to Municipality class of business.
- Kinsale Insurance Company – Declined.
- Westchester – Willing to provide coverage, but indicated a minimum premium of \$50,000 for this type of exposure.
- Aspen – Willing to provide coverage, but similarly indicated a minimum premium of \$50,000 for this type of exposure.

Lexington Insurance has expressed flexibility by agreeing to waive their policy fee, although the inspection fee remains mandatory. They require a property inspection to ensure compliance with all safety and building standards.

Lexington Quoted Premium:

GL: \$26,156

Excess: \$15,600

Total: \$41,756

The GL and Excess policy can be cancelled at a 25% minimum earned premium. The Inspection Fee would be 100% earned and there would not be a return premium on this fee.

**Recommendation:** It is recommended that we move forward with the Lexington Insurance quote at a premium of \$41,756.00, with the understanding that this policy can be canceled if we secure alternative coverage at a more competitive rate. This approach allows us to expedite the process of obtaining Renters Insurance, which is essential for contractors to begin construction work in the new facility without delay.

By proceeding with Lexington's policy, we ensure that immediate insurance needs are met, allowing project timelines to remain on track. Additionally, we can continue exploring other market options to secure more favorable terms if they become available, providing flexibility in managing our insurance coverage while supporting project requirements.

# PROVIDER SECURITY STANDARDS

## MCGRIFF (MCGRIFF INSURANCE SERVICES, LLC.)

The following is a brief summary of the measures we have taken as your agent/broker to review and objectively report to you the financial security of your insuring companies. Information is included from Best Company, our primary security rating source, and the internal policies and standards, which we have established to address this important issue for our clients.

## MARKET SECURITY REVIEW

McGriff has established and continues to maintain an internal “Market Security Review Group” composed of senior management representatives from the Finance, Marketing, Wholesale, and Administrative Divisions of the company. This Group’s purpose is to develop and implement a policy, procedure, and standard for the review of financial security of all insurers, intermediaries, and associations used by McGriff.

This Group meets periodically to review the current listing of all companies, intermediaries, and associations that are actively used by McGriff. It will also act on any pending requests received to have new providers activated, and to inactivate any providers that do not meet current McGriff standards.

## PROVIDER CLASSIFICATIONS

**“Approved Provider”** – A.M. Best Secured Rating with a minimum rating of A-, Demotech Financial Stability Rating of “A, Exceptional or ALIRT score of 50 with six (6) or fewer flags. For foreign insurers whose rating is not tracked by A.M. Best, other internationally recognized rating organizations will be used.

**“Exception Provider”** – Any provider whose Best’s rating is below “A-”. The A.M. Best’s rating of an “exception” provider will be included on all McGriff proposals delivered to clients or prospects. In addition, these providers which have been reviewed by the Market Security Review Group and the client may be considered an exception security based on other factors. The client may be required to sign a form of disclaimer or acknowledgement of receipt of this information.

**“Prohibited Provider”** – All other providers not mentioned in one of the paragraphs above. These providers will not be set up for active use in the McGriff agency management system(s) at any time, for any reason.

**History** – A.M. Best Company was incorporated in 1899 as the first rating agency in the world to offer reliable information on the financial condition of U.S. insurance companies. The **Best’s Rating Guide** was first published in 1900, and has since become a cornerstone of the security review process by continuously evaluating the financial integrity of over 4,100 insurance companies. In 1984, the first edition of the **Best’s International Rating Guide** was published, reporting on the claims-paying ability of over 950 international insurers.

The information used by Best’s to rate insurance carriers is provided by the companies themselves as a part of their normal filings with the National Association of Insurance Commissioners, those states in which the company is licensed, the SEC and/or with its shareholders. Rating reviews are performed annually on each insurance company and on an interim basis as conditions dictate.

## PROVIDER SECURITY STANDARDS (Con't.)

Best's Rating System – The Best's rating system is designed to evaluate a wide range of objective and subjective factors that affect the overall performance of an insurance company (not applicable to associations or intermediaries). - Quality and Diversification of Assets

- Liquidity

**PURPOSE:** To discuss a resolution awarding a contract to AT&T for internet and phone services in the amount of \$46,740 per year to be funded out of American Rescue Plan Act (ARPA), for one year, and General, for four years, funding for a total period of five (5) years. There is also a one-time fee of \$5,152 for the Network and Office@Hand set up.

**NEED/ IMPACT:** The City has the need for new and improved internet connectivity and phone services. We are currently experiencing frequent outages with the current internet service provider, which results in a large amount of downtime for staff. This affects the staff's ability to be responsive to residents, business owners, council and the general public.

This is a comprehensive solution tailored for the City, all conveniently billed through AT&T invoicing, by addressing our needs as follows:

**Network:** The locations at 3620 Montreal Creek Ct, 1055 Rowland Street, 3867 Norman Road, and 3913 Church Street will be interconnected using leased fiber known as ASEoD (AT&T Switched Ethernet on Demand). The head end at 736 Park North Blvd will provide internet connection for all buildings in this design. In the event of an outage, each building will have the capability to offload internet independently, ensuring redundancy across the sites.

**Managed Equipment:** Fatpipe will supply the equipment at each site to manage connectivity, establish firewall requirements, and network all sites together. This managed service will streamline the ticketing process for reporting any potential outages or requested changes in the future.

**Promotional Credits:** This order qualifies for two promotional offers. First, each site will receive a \$1,000 credit by the third month, totaling \$6,000, which will be credited on your internet invoice. Second, the Fatpipe onsite installation and configuration fee, valued at \$5,000, will be waived immediately.

**Office@Hand:** Office@Hand will serve as the City's cloud-based phone solution, enabling quick implementation of office phones on a secure platform. Provided by AT&T, the phones and service are

designed to integrate seamlessly with the aforementioned network design. Please note that these devices need to be connected via Ethernet cable to establish a dial tone. This service is also eligible for promotions:

- **Offer 1:** Receive a \$70 credit per phone, applied during the 3rd-5th billing cycles, totaling \$1,330.
- **Offer 2:** Enjoy three months of free service, with the credit applied on the 4th bill, totaling \$1,167.

**AT&T Phone for Business Advanced:** Will be utilized for your pool location. This service will connect separately from our main network over a 5G signal. This ensures that a call can be made at anytime or emergency event. The equipment utilized for this service is called the VAB-1 and has a battery built in for power outage scenarios.

**RECOMMENDATION:** Staff recommend vendor AT&T for approval to enter into a contract in the amount of \$46,740.00 for this project and should be paid from the American Rescue Act Plan (ARPA), for one year, and General, for four years, funding for a total period of five (5) years as well as the \$5152 one time fee for the Network and Office@Hand set up.

**4.6.1.** Customer represents and warrants that it has appropriate rights to provide End User data (which may include Customer Personal Data) to AT&T in connection with the Service. Customer expressly grants AT&T permission to access information contained in application layer 7 for the sole purpose of managing the performance of the Wi-Fi network. From time to time AT&T will perform real time packet capture to analyze and troubleshoot network issues and Customer grants AT&T permission to perform such operations for short intervals as necessary for network management purposes.

**4.6.2.** AT&T agrees that, in performing the network management function, it will:

- Use or monitor End User data shared with AT&T only for network management purposes and for providing metrics reports, consistent with the AT&T Privacy Policy; and
- Establish data retention protocols, so that AT&T retains data shared with it for as long as reasonably necessary for network management purposes.

**4.6.3.** Customer agrees that in connection with the network management function, it will:

- Use or monitor End User data made available through the network management function of the Service only for network management purposes, unless it secures additional consent from End Users, or has another lawful basis for processing the data. Purposes beyond the network management function include, but are not limited to, marketing, advertising, and the examination of content and communications;
- Obtain and maintain any and all legally required employee or End User consents, or establish other lawful bases, for the processing or use of End User data. (AT&T can provide an example of the legally required employee or End User consent);
- Obtain multiple consents for distinct purposes, and proposed combinations of personal data, even if supplemental software/technology is required;
- Use only Customer SSIDs;
- Present the End User with Customer's terms of service and applicable privacy policy;
- Establish data retention protocols so that data Customer processes is retained for no longer than is reasonably necessary for network management purposes;
- Not access, use, or share content of communications, content of email or texts, content of shopping carts, or search term queries, etc., and
- Not attempt to re-identify anonymized data.

**4.6.4.** Customer is responsible for the way the data is used by Customer; and its employees, guests, and representative's access to and use of the data, content, or communications generated by this Service.

**4.6.5.** To the extent that a website or online service is directed to or likely to collect personal information from children under the age of thirteen, Customer agrees to comply with the federal Children's Online Privacy Protection Act and provide parental notice and advance parental consent prior to collecting such personal information.

**4.6.6.** The Service allows Customer to collect and use an End User's location through Bluetooth Low Energy (BLE) and Wi-Fi based location technologies. Such use may be subject to various U.S. and international laws and regulations, including those promulgated by the Federal Trade Commission and other industry regulators (e.g., Privacy Forum's Mobile Location Analytics Code of Conduct, NAI, GDPR, CCPA), with which Customer agrees to comply. Customer agrees not to provide or sell location data to third parties without AT&T's prior written authorization.

**4.6.6.1.** This ability to collect and use location information is different than what is done with GPS or other technologies. Because the Service collects and uses location information, AT&T is offering the following information, but such information is not intended to be legal advice. Customer should consult with an attorney for legal advice.

**4.6.6.2.** Depending on how Customer collects or uses the Service, Customer may be required to provide notice, obtain opt-in consents, or provide periodic reminders, all separate from providing terms and conditions to End Users, so that End Users will be aware that location is being tracked when visiting Customer's Sites. If Customer buys other products or services from AT&T or others that, in conjunction with Customer's business application, allows Customer to know when an End User is at Customer's Site(s), Customer may be required to provide separate notices, obtain separate opt-in consents, or provide periodic reminders (all separate from terms and conditions) so that End Users will be aware that location is being tracked in multiple ways when visiting Customer's Site(s).

**4.6.7.** Customer may not use AT&T's name, brand, or mark, with third-parties or End Users in connection with the Service without AT&T's written consent.

**PURPOSE:** October 1, 2024, The City Council approved an ordinance amending Chapter 3 of the Code, regarding alcoholic beverages, to allow “late night sales” for consumption on the premises subject to certain conditions.

The City Clerk’s Office received and reviewed an Alcoholic Beverages Late Night Sales application from Tesfamariyam H. Wegayehu, owner of Ponce Sports Lounge for Late night alcohol sales for consumption on premises. The location to be considered for this application is located at 3924 E. Ponce De Leon Ave., Clarkston, GA 30021.

**NEED/ IMPACT:** The Clarkston Police Department met with Mr. Jimmy at Ponce Sports Lounge on October 22, 2024, at approximately 11:30 a.m. to assess the noise level from the exterior of the business. Mr. Jimmy agreed to monitor the volume closely and keep the music at Level 3, which appeared reasonable and not a nuisance when tested from outside, including the parking lot.

The City Clerk determined all terms and conditions have been met pertaining to the ordinance.

**RECOMMENDATION:** Late night sales permits may be granted by the City Council if the City Council finds that late night sales at the subject location would not have an undue negative impact on the health, morals or general welfare of the residents of the city.

**PURPOSE:** To obtain approval to commence with the SPLOST II bond-funded “Norman Road Design/Construction Plan Development and Permitting” project – Phase I.

**NEED/ IMPACT:** The safety deficiencies that exist at the Norman Road dam at Clarkston Lakes necessitates moving forward with PH I of the project which begins with the procurement of a civil engineering firm to develop design and construction plans.

**RECOMMENDATION:** The City Engineer has identified on-going deteriorating conditions of the Norman Road dam as determined through various reconnaissance site visits and geotechnical reports and investigations. Additionally, the City Engineer undertook a site reconnaissance on September 27, 2024 and prepared a “Report of Findings – Hurricane Helene Damage Assessment of Norman Road Dam” dated September 30, 2024. The report summarizes the damage to the dam and recommendations for repair.

The City Engineer and Public Works staff recommend the following next steps for PH I:

- Prepare scope of work for engineering design and construction plan development that includes satisfying all regulatory permitting requirements. Scope of work will also include a minimum of two (2) public meetings, development of a minimum of two reconstruction alternative approaches and a Probable Cost of Construction Cost for each.
- Begin advertising for professional engineering services before the end of January 2025.
- Selection of professional civil engineering services will be “qualified-based” where the cost will be a component, not the only consideration, in the selection process.

Upon completion of Phase I tasks, the City Engineer and Public Works staff will work with the city manager and council to identify funding availability and scheduling for Phase II – Construction Improvements.

**PURPOSE:** To obtain approval for contractor services to repair Norman Road dam and associated infrastructure as outlined in the “Report of Findings - Hurricane Helene Impacts to Norman Road dam” dated September 30, 2024.

**NEED/ IMPACT:** Repairs are necessary to minimize further deterioration to the dam. Repairs are required to the Norman Road pavement, the partially collapsed decorative fence at the top of the downstream slope embankment, the stone retaining wall that has partially collapsed along the spillway downstream channel, the cracking/settlement of the roadway concrete flume and the “sloughing” of the downstream embankment slope. Further movement of soils on the downstream slope will result in negative impacts to the roadway while further compromising the core of the dam.

**RECOMMENDATION:** The City Engineer identified the safety deficiencies to the Norman Road dam as outlined in the “Report of Findings” and would recommend that the following steps occur to remediate the issues herein:

- Prepare scope of services to provide temporary repairs to the areas identified herein
- Forward the scope of services to Procurement to advertise to-bid
- Recommend the lowest and most qualified bidder and present to city council for approval before the end of the year
- Initiate repairs in January 2025 or sooner

The City Engineer estimates the cost of construction to be on the order of \$125,000 to \$150,000.

## **REPORT OF FINDINGS**

### **HURRICANE HELENE IMPACTS TO NORMAN ROAD DAM**

**Subject:** Site Investigation – Visual Observations  
Norman Road Dam

**Date of Site Visit:** 9-10:30 AM & 2-3 PM; Friday; September 27<sup>th</sup>, 2024

**Purpose:** Assess Damage and Offer Recommendations for Repair

**Site Visit Attendees** Marcus Seaton; City of Clarkston Public Works Director  
Larry Kaiser, P.E. #18726

#### **Site Assessment Findings**

The undersigned offers the following visual observations and potential cause of damages.

**Exhibit A** provides a **Location Map** depicting the observed dam distresses:

1. On the southwest corner of the downstream embankment slope a “shallow slide” (also known as a slough) was observed. The damage visually appears as a depression on the slope of the embankment where the displaced soils have moved (slid) down the slope. The crest of the “slide” is located approximately 4 feet from the edge of the south side of Norman Road. Refer to Image A. This type of damage is likely associated due to one of the following conditions:
  - (a) Saturated soils from the 6 inches of rain that occurred from September 25<sup>th</sup> to September 27<sup>th</sup>, resulted in a loss of strength of the embankment soils, in combination with an existing overly steep downstream embankment slope, or
  - (b) The dam was breached with water overtopping the road and curb on the south side which resulted in erosion of the downstream embankment slope, or
  - (c) Storm water runoff along the curb and gutter on the south side of Norman Road exceeded the height of the curb and transversed across the roadway shoulder to the embankment slope

The most likely cause of the “shallow slide” is scenario (a). The dam was not constructed in accordance with standard engineering or construction standards or specifications when it was built in 1926. As such the soils used in the construction of the earthen dam were not properly compacted. In addition, the downstream slope is at 1H:1V which is overly steep. Dam design

principals require that downstream slopes are a minimum of 2.5 (H):1 (V) (24 degrees) or flatter. The saturated soils from the rainfall event resulted in a loss of strength of the embankment soils; in combination with the steep of 1H:1V or a 45 degree slope, that resulted in the failure.

It should be noted that all the dam downstream stopes are approximately 1H:1V, and likely constructed in the same manner as the failed area, thus are prone to the same failure that is described herein. It was also observed that previous “sides” or sloughs have occurred in the past as evident by the use of stone rip rap and pieces of concrete used on the slope to mitigate/repair these failures.

2. A 50 foot section of decorative safety fence, that runs parallel to the south side of the road and installed 20 + years ago to provide pedestrian safety for those walking on the roadway shoulder, was damaged when the embankment slope failed. Refer to Image F & F-1.
3. The crest of the failed slope is approximately 4 feet from the back of curb on the south side of the road. Without repairs to the slope, it would expected that the structural integrity of the roadway would be compromised regardless of any rainfall events. Refer to Image F & F-1.
4. Granite retaining wall at the base of the failed downstream slope on the southwest corner of the dam has been displaced and will require reconstruction. This likely occurred when the stream elevation during the stream event topped the wall and eroded the backfill embankment soils. Refer to Image B.
5. The eastern end of the retaining wall on the southeast side of the principal spillway stream channel has collapsed and requires repair. The stream elevation during the stream event washed out the retaining wall base and backfill soils resulting in the wall failure. See Image D
6. The entire retaining wall along the principal spillway stream channel has moved horizontally toward the stream channel. This retaining wall has the high likelihood of failure. See Image D-1 & D-2
7. The fence on the upstream embankment slope was been displaced horizontally and vertically in the direction of the lake. This fence movement is directly associated with settlement of the upstream embankment slope. See Image E & E-1.
8. Small depressions or holes was observed in the roadway shoulder between the crest of the upstream embankment slope and the edge of pavement. A probe rod was used to assist in determining the depth of the depression. Approximately depth of probe was 2 feet. Such depressions are an indication of slope instability. Refer to Image G.
9. Roadway emergency spillway flume has displaced exhibiting horizontal cracking in the concrete allowing water to undermine the flume, Adjoining granite and concrete retaining walls have detached likely due to displacement of the flume. Refer to Image C.
10. The west side of spillway stream channel embankment has eroded is currently within 2 feet of compromising the pier footing for the boardwalk. There is an elevated potential for undermining this footing if any significant rainfall events occur in the future

### **Site Repair Recommendations**

The following are the recommendations to initiate corrective measures to the distressed areas identified above:

- Prepare a scope of work that articulates the required repairs with the understanding that such repairs will only be a temporary solution to the required long-term and holistic dam replacement tasks that will be necessary.
- Scope of work will require lane closures as repairs are undertaken
- Decision required on the options available for obtaining quotes for emergency repairs vs. advertising to-bid for 4 weeks. That decision will determine; (a) how to protect the slough that exists from rainfall events until a contractor is selected; and (b) the frequency and duration of inspections to monitor any changed site conditions
- Once the lake level lowers to its normal pool elevation, seek assistance from Public Works to mow all vegetation flush with the ground on the upstream slope embankment. CIS will then assess the condition on the upstream slope and report back to the City Manager.

### **Recommendations After Remedial Repairs**

The undersigned recommends that City Council and Mayor move forward with directing CIS to prepare a scope of services for engineering services to prepare design and construction plans and all required EPD permitting necessary for various dam replacement options.

The SPLOST II approved project list includes \$300,000 in FY 25 for engineering services for the Norman Road dam Replacement project. Preparing a scope of work and advertising for 4 weeks will allow staff to procure the services of an engineering firm by early 2025.

No construction funding has been allocated in the SPLOST II Bond program. Staff will need to present to the city manager and council various construction funding options as the engineering phase is ongoing.

**Zoning History:**

A review of City records indicates that the subject area was annexed into the City in January 2019. At the time of annexation, the subject property was zoned as NR-1, (low-density neighborhood residential district) intended primarily for single-family detached dwellings, with greater amounts of open space. The annexation and rezone request from NR-1 to NR-3, High Density neighborhood residential district was approved on May 7, 2019, with zoning conditions. The recorded final plat dated December 8, 2022, depicts 36 lots.

**Table 1.0** illustrates the zoning and current land uses for the adjacent properties:

**Table 1.0**

East	NR-1, Low density residential	Single-family dwelling

**Rezoning Review Criteria: Analysis of Request to modify a zoning condition (Article II, Sec. 201).**

**Criteria 1:** *The effect upon the health, safety, morals, or general welfare of the public compared to any hardship imposed upon the individual property owner seeking rezoning should rezoning be denied.*

The proposed request to add the words “or garage” to the existing zoning condition will allow a completely enclosed structure that offers a property owner the privacy, protection, and security for private property, storage, and other valuable items such as: sports equipment, yard tools, and/or gardening supplies.

**Criteria 2:** *Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property.*

Yes, garage doors are reasonable and suitable for the privacy and protection of prospective property owners in the subdivision and nearby property. They provide protection and personal privacy.

**Criteria 3:** *Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property.*

No, the proposal will not have any adverse effect on the existing use or usability of adjacent or nearby properties. A garage is defined as a completely enclosed structure that offers privacy, protection, and security for a vehicle, storage, and other valuable items. According to real estate experts, a garage adds value to a home versus a carport. Carports are inexpensive and easier to install but may lack curb appeal. They also make private property susceptible to intruders and weathering erosion.

**Criteria Point 4:** *Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.*

A carport is defined as an outdoor structure providing overhead protection from the elements. They are smaller, more economical, and quicker to build. A carport can be attached or a freestanding structure to a house that can be installed without a permit depending on its size.

A garage is defined as a completely enclosed structure offering storage space and overall security. A garage can be separated or attached to a house. Garages match the home’s color and material scheme and come in design choices. A garage provides dry, secure, often climate-controlled storage for not only vehicles but also appropriate for storing other items such as sports equipment, yard tools, gardening supplies, boxed storage items, and more.

Garages provide extra protection and personal privacy.

**Criteria Point 5:** *Whether the zoning proposal will result in a use that may cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.* No, the nature of the proposal to add the words “or garage” to the existing condition will

have no impact on or cause any excessive or burdensome use on existing streets, transportation facilities, utilities, or schools.

**Criteria Point 6: Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.**

No. The applicant is requesting to modify zoning condition # 19 which stipulates, that “Every home shall have a minimum of one visitor parking space to be located behind each home’s **carport**” to read, “Every home shall have a minimum of one visitor parking space to be located behind each home’s **carport “or garage”**”.

As noted under criterion #4, a carport is defined as an outdoor structure providing overhead protection. They are more economical and quicker to build. A carport can be attached or a freestanding structure to a house, which can be installed without a permit, depending on its size. On the other hand, a garage is defined as a completely enclosed structure used for storage space and security. A garage may be separate or attached to a house. A garage generally matches the home’s color and material scheme and comes in design choices. Additionally, a garage provides a dry entrance, security, and storage for not only vehicles but also for storing other expensive items such as: sports equipment, yard tools, gardening supplies,

**Criteria Points 7 & 8: Whether the zoning proposal is compatible with the principles of the most current adopted version of the city's future land use map and comprehensive plan.**

The Clarkston 2040 Update proposed a housing policy to create design standards that reflect the architectural diversity and history of Clarkston listed in a previous LCI planning study (2015) under Land Use Problems and Issues, which stated that existing structures were poor aesthetically and lacked design standards. Therefore, it is reasonable to believe that adding the option for a garage in the subject area would bring a higher economic return to the prospective property owners.

**Comments:**

The community meeting was held on October 7, 2024. The meeting was held at 3827 Cottage Circle, in the subdivision. The surrounding property owner within 300 feet attended the meeting at the subject site (see Exhibit “A”).

See Exhibit “B” for the notification letter to the surrounding property owner within 300 feet and comments from attendees.

**Recommendation:**

Staff recommends **approval** of the request from the applicant to modify the zoning condition to add the words “or garage” to the zoning condition.

All other conditions remain the same.

CITY OF CLARKSTON

Dear Lisa,

Although we feel this zoning condition change is unnecessary, because there are 8 homes in the community which have garage doors and garages or Private carports. We are requesting the City to revise the existing condition number 19. It states the following "Every home shall have a minimum of one visitors parking space to be located behind each home's carport". We are requesting the condition to be revised to read "Every home shall have one visitors parking space to be located behind each homes carport **or garage.**"

The following are the responses to the review standards:

- a) We believe it is immoral to allow some residence and not all to have the safety and privacy of a garage.
- b) The use of the property will not change and will allow it to be the same as the existing homes and homes in the surrounding area.
- c) The change will allow all homes in the subdivision to be the same.
- d) The revision will allow the new homes to have the same value as the existing homes.
- e) The use of the property will remain the same and will not cause increase the burdon on existing facilities.
- f) Because the City has already permitted and issued certificates of occupancy for 8 homes under the conditions as they are currently written, we believe that is supporting grounds for approval.
- g) We cannot find there are any future plans in the city to not allow garages on new homes in the city.
- h) We cannot find there are any future plans in the city to not allow garages on new homes in the city.

We appreciate your consideration of this matter and look forward to working with you on this project.

Sincerely,

Tad Braswell  
Manager, Southwyck Homes

**F. OLD BUSINESS**
**F1) Public Hearing Supporting Application to Rezone 3827, 3835 and 3861 East Avenue from Conditional NR-1 (Low Density Residential) to Conditional NR-3 (High Density Residential)**  
 Mayor Terry recognized the applicant Mr. Brawell, Oak Hall Companies, who presented the proposed plan to annex 6 acres into the city and build 36 cottage style homes with 24 conditions.

Proposed Zoning Conditions for 3827, 3835 and 3861 East Avenue:

- The property will generally be developed substantially as depicted on the attached conceptual site plan dated April 29, 2019, particularly as to the depicted site configuration and vegetated buffers. Such conceptual site plan is attached hereto and labeled as Exhibit "B."
- The site shall have no more than thirty-six (36) single family cottage-style homes.
- None of the homes will have more than three (3) bedrooms.
- The building materials for the homes shall be a mixture of real brick, stone or hard-plank siding.
- No vinyl siding shall be allowed.
- All homes will be wired to be electric vehicle and solar ready.
- The driveways and sidewalks of each unit shall be a pervious material.
- The outlet structures for the storm water system and the location of the storm water facilities shall be substantially the same as depicted on the plan attached hereto and labeled as Exhibit "C."

subject to approval by the City's engineer. Developer shall work with the City's engineer to ensure that adequate erosion control measures are provided to protect the stream.

- A majority of the trees planted on the site will be of a native species. No non-native species will be planted on common areas of the property. No more than two (2) accent trees, such as Japanese Maples, may be planted in each individual yard.

- Developer shall grant to the City a 10' permanent easement and a 30' construction easement for the future construction of a trail system near the northeast corner of the property as shown on the conceptual site plan attached as Exhibit B. Such easement shall be located such that it does not encroach within the required 75' stream buffer of Stonyfield Creek.

- The developer shall donate \$40,000 to the Clarkston Affordable Housing Trust or the Clarkston Environmental Trust, at the City's election, prior to recording the Final Plat.

- The developer is required to adhere to all development reviews required by the City of Clarkston including, but not limited to, for the land disturbance permit, landscape and tree replacement plans.

- The developer shall adhere to all reviews as required by outside agencies with jurisdiction over the property, including but not limited to, DeKalb County Fire Marshal's office, DeKalb County Water and Sewer Department and the Georgia Bell and Water Conservation Commission.

- All lots developed at the property shall be subject to restrictive covenant to participation in a mandatory homeowners' association ("HOA") as described by these conditions.

- A maximum of three (3) of the homes may be rented or non-owner occupied at any given time. This restriction shall be included in the HOA governing documents and be binding upon all home owners.

- The HOA shall have a professional engineer inspect the storm water facilities and prepare a report on each facility's condition bi-annually. This report shall be promptly submitted to the city manager.

- The HOA shall be managed by a third-party manager employed by the HOA Board of Directors.

Page 3 of 7

  - All landscaped areas, including those located on individual lots, shall be maintained by the HOA.
  - All streets shall be private and maintained by the HOA.

- There shall be an Architectural Review Board. This ARB shall be chaired by the developer and 51% of all the homes are constructed. Standards or revisions to any structure shall be approved by the ARB.

- The Developer shall remain the Declarant until 100% of the homes have been sold.

- Any change to the management structure of the Board will have to be approved by the Homeowners Association Board of Directors. The HOA will always be managed by a third-party management company.

- Before selling any lot, developer shall convey to the City an access easement for inspection (not maintenance) of the storm water facilities on the property. The HOA shall maintain such facilities.

- Every home shall have a minimum of one visitor parking space to be located behind each home's garage.

- Common areas shall be jointly owned by the owners of the individual parcels.

- Yards along the exterior shall include an opaque, vegetated landscaped buffer on the sides that abut other residential properties.

- Final plat with covenants shall be submitted, reviewed, accepted and recorded before construction begins. Recording of the covenants and final plat shall create a separate lot for each dwelling place and subjects each lot to the development to private deed covenants that ensure the maintenance of the approved plan as exhibited with the required maintenance of the common areas.

- The city manager (in consultation with an appropriate expert) shall review and approve the landscape plan for compliance with "regenerative landscaping" principles.

- All lots created on the property shall conform with the required dimensions and other development controls applicable in the NR-3 zoning district, unless a variance is granted by the City.

**SECTION 2.** Chapter 2, Article 2, of the City Code is hereby amended to add new Section 2-35, which shall provide as follows:

**“Sec. 2-35. Procedures for setting agendas.**

Agendas for meetings of the City Council shall be set according to the following procedures:

- (a) *Adding items to the agenda in advance:*
  - 1. The city manager may place any business item on the agenda that he or she deems pertinent to the business of the City.
  - 2. In order for councilmembers to place an item (including, but not limited to, presentations) on a council meeting agenda prior to the meeting, one councilmember must sponsor the item and a second councilmember must

affirmatively indicate to the city manager their agreement to have the item placed on the agenda. If such an item is sponsored by the mayor, two councilmembers must affirmatively indicate to the city manager their agreement to have the item placed on the agenda.

3. In the case of work sessions only, each councilmember and the mayor are limited to sponsoring a maximum of two agenda items per meeting for advance placement on the agenda. However, a majority of the Council may vote to add an additional item or items sponsored by the same councilmember when adopting the meeting agenda.
  4. For continuity, all agenda items on a work session agenda must appear on the immediately following city council meeting agenda.
- (b) *Requirement for prior appearance on work session agenda before regular meeting.* To ensure that the public is aware of prior discussions on a potential agenda item, councilmembers may not add an item to a regular meeting agenda unless it has appeared on a work session agenda within the seventy-five days preceding the regular meeting. This requirement may be waived by unanimous vote of the City Council at the time the final adoption of the regular meeting agenda
- (c) *Deferred items.* Items that have been tabled, postponed, deferred, referred to a Standing Advisory Committee, or withdrawn at work session should be so noted on the following city council regular meeting agenda.
- (d) *Publication of advance agenda.* The City Clerk shall cause the anticipated agenda for each regular meeting and work session to be published to the City's website and posted at City Hall as soon as possible, but not later than forty-eight (48) hours prior to the start of the meeting.
- (e) *Final adoption of agenda.* At the regular meeting or work session, the Council shall, by majority vote, adopt the agenda for the meeting before doing any other business. The advance agenda may be amended at this time, as necessary, by proper motion and majority vote."

SECTION 3. Chapter 2, Article 2, of the City Code is hereby amended to add new Section 2-36, which shall provide as follows:

**"Sec. 2-36. Attendance by mayor and councilmembers; penalty for excessive absences.**

The mayor and each councilmember are expected to attend all work sessions and regular meetings if possible. Absences shall be addressed according to the following rules and penalties:

- (a) Councilmembers should notify the mayor or city manager as soon as possible if they are not able to attend a work session or council meeting in person or remotely. Their absence will be announced at roll call.
- (b) *Remote attendance.* Pursuant to O.C.G.A. § 50-14-1(g), absent emergency conditions or the written opinion of a physician or other health professional that reasons of health

prevent a member's physical presence, no member shall participate by teleconference more than twice in one calendar year.

- (c) When the mayor or a councilmember is absent from more than two meetings (which include both work sessions and regular meetings) during a calendar year, the city council may, by majority vote, impose a fine not to exceed \$350 for each such meeting missed. For purposes of this section, the mayor or a councilmember is not absent if they attend the meeting remotely as permitted by O.C.G.A. § 50-14-1(g), or if their attendance was prevented by an emergency (as determined by the discretion of the city council)."
